Kigali Rwanda

### Profile

Dedicated and efficient full stack developer with 2 years of experience in Node.js, Express.js, React.js, React-Redux, Angular Python-Django, and PostgreSQL. I am very passionate about problem-solving, satisfying the users with the best experience as well as the best delivery service.

### Experience

#### Software Engineer Andela

2019 – present Kigali – Rwanda

- Work on Tembea product which is a transport automation application. this involves working on the backend and the front-end, where I had to create a WhatsApp notification for the drivers.
- Worked on Authors Haven which is a platform to help writers to express their ideas and the readers to read those ideas.
- Onboard new devs on the team.

#### Web developer Tech Avenue 137

September 2017 – November 2018  
Kigali – Rwanda

- Designing website mockups. This involves thinking about the user interface that will be best for the users.
- Developed 3 websites from scratch following the mock-up. This involves developing the front-end of the web (the interface) and its backend using Python/Django.
- Training new Co-workers and Interns about Front-End and the framework(Django) development. This involves onboarding newcomers and helping them to get familiar with the work.

### Education

#### Advanced Diploma Rwanda

Davis college Akilah campus 2014-2017

### Awards

#### Award for winning Public Speaking Competition

Davis College Akilah Campus

2106

Certificate of Recognition as the First Runner-up in Public Speaking Competition.

### Volunteering

#### Facilitator Peace Corp

July – August 2016

Taught young women about technology. Taught students how to create cartoon (animation) using software called Scratch in their computers. I also taught them how to use computers and how to create an email as well as how to use it.
